Electra

TOWNIE GO! MEN'S' / EBONY

TOWNIE GO! LADIES' / EBONY

The Electra **Townie® Go!** is an easy to use, battery powered, pedal assist bike with surprising power that'll make you want to go forever. The system automatically kicks in once you start pedaling for an added boost to help conquer hills with a smile and ride long distances without breaking a sweat.

We could get into a long description about how the **Go!**'s SRAM E-matic system works with lots of big words like planetary gear systems and thrust application, but it's really quite simple. The motor monitors the rider input torque and speed and automatically delivers extra power when needed and energy efficiency over longer distances.

The pedal assist system has been perfectly blended into Electra's Townie Balloon bicycle. It's like the jetpack you've always wanted, and the comfort and control you've always enjoyed with Electra's patented Flat Foot Technology®. Yes, the future is here.

Now Go! have some fun!

TOWNIE GO! MEN'S / MATTE GOLD

TOWNIE GO! LADIES' / SKY BLUE

MSRP \$2,199.99

Available early 2013

- Lightweight 6061-T6 aluminum frame with patented Flat Foot Technology® and Hi-Ten steel unicrown fork
